

Smile. There's an Affordable Way to Care for Your Teeth

Helping You Stay Healthy

Taking care of your teeth can be expensive. That's why the right dental insurance is so important — it not only pays for preventive care that can keep you and your family healthy, but it also helps pay for more extensive, costly and often unexpected expenses — such as fillings, crowns and root canals. Plus, you save money when you use one of our in-network dentists.

Why Choose Guardian® for your Dental Coverage

We have been providing outstanding dental plans to millions of Americans for more than 60 years. When you enroll in a Guardian Dental plan, you have access to one of the nation's largest dental networks, so you know there's always high quality dental care close by.

From preventive checkups and cleanings, to comprehensive oral care treatments, we have you covered.

A New Benefit for Members

Veeva Systems is now offering a Cosmetic Dental Benefit through Guardian.

What's covered?

- Teeth Whitening (either an at home kit or whitening prescribed through your dentist)
- Veneers (prescribed through your dentist)
- Electric toothbrushes available for purchase (prescribed through your dentist)
- Dental bonding (prescribed through your dentist)

How does it work?

- Insured Member let your dentist know you have a \$300 lifetime maximum (per family) dental benefit for cosmetic services.
- Your Dental Office should submit electronic toothbrushes under CDT Code D1999. All other services will be coded as specified by the CDT manual. Benefit will be applied to the lifetime maximum benefit accordingly.

Note: Any procedure/service amount over the \$300 lifetime maximum will be billed directly to or payable by the Insured Member.

It's Easy to Use Your Plan

To find an in-network dentist go to guardiananytime.com or download Guardian's 'Find a Provider and ID Card' app to your mobile device.

Did you know...?

- Among adults aged 20-64, 27 percent had untreated tooth decay.¹
- For every spent on preventive services an estimated \$50 is saved on more complicated procedures.²
- Tooth decay is the most common childhood disease — impacting sleeping or eating habits and can contribute to school absences.³
